# How to integrate Pdf in your shinyApp:

1. Save the file in a place where the UI can reach it (when i tried i used the www folder)

2. Use the following function in your UI to display the pdf :

```
tags$iframe(style="height:400px; width:100%; scrolling=yes",
            src=„yourpdf.pdf"))
```

4. Decide on which arguments you want to use:

Attribute	Value	Description
allow		Specifies a feature policy for the <iframe>
allowfullscreen	true false	Set to true if the <iframe> can activate fullscreen mode by calling the requestFullscreen() method
allowpaymentrequest	true false	Set to true if a cross-origin <iframe> should be allowed to invoke the Payment Request API
height	pixels	Specifies the height of an <iframe>. Default height is 150 pixels
loading	eager lazy	Specifies whether a browser should load an iframe immediately or to defer loading of iframes until some conditions are met
name	text	Specifies the name of an <iframe>
referrerpolicy	no-referrer no-referrer-when-downgrade origin origin-when-cross-origin same-origin strict-origin-when-cross-origin unsafe-url	Specifies which referrer information to send when fetching the iframe
sandbox	allow-forms allow-pointer-lock allow-popups allow-same-origin allow-scripts allow-top-navigation	Enables an extra set of restrictions for the content in an <iframe>
src	URL	Specifies the address of the document to embed in the <iframe>
srcdoc	HTML_code	Specifies the HTML content of the page to show in the <iframe>
width	pixels	Specifies the width of an <iframe>. Default width is 300 pixels

5.

Done. Should look something like this:
